

Management, Leadership, Innovation

Master of Arts (M.A.)

What the program offers to you

The Master's degree program „Management, Leadership, Innovation“ is dedicated to the increasing importance of innovation in intercultural, digital and technological contexts. It supports students from different countries and disciplines in developing competencies for building innovation in interdisciplinary, and constantly changing fields of action.

The program is tailored to address the diverse and evolving challenges and needs faced by modern businesses and entrepreneurs. By combining solid theoretical foundations with relevant business management strategies, and best practice examples from various sectors, the program enables students to develop and implement goal-oriented solutions for a wide range of company-specific transformation processes.

What the program qualifies you for

The program opens up a wide range of career and development paths. It offers students the opportunity to found and drive their own startup during their studies. After graduating, they will possess the relevant skills to further develop their startup, join an emerging startup as a first-hour employee or to contribute to a future-oriented, international company in the field of innovation management. Additionally, graduates have the option to follow a research-oriented career, working in research institutes, universities or other scientific organizations.

How to get admitted to this program

- ▶ First degree of professional qualification with a minimum grade of 3.0 or higher or an equivalently recognized final examination
- ▶ International experience
- ▶ Submission of a research proposal (one-pager) in English language
- ▶ Introductory interview with the head of the degree program
- ▶ Language requirements: English B2 or higher. (German is not mandatory for this program)
