

WE ARE HIRING! BECOME OUR CO-FOUNDER

full-time position at Hochschule Koblenz during the 18-month founding phase

ABOUT US

We're a green-tech startup backed by top scientists and institutional partners. With early customer traction and funding, we're now preparing for the next phase – supported by FZJ and HS-Koblenz, we're applying for the EXIST program, which offers full-time paid positions during the founding phase.

YOUR ROLE

We're looking for a co-founder to join our team as Head of Business. You can still be studying or already finished

- Building a business model
- Pitching the company at startup events & conferences
- Branding, marketing, sales, customer & investors relations

OUR PRODUCT

Spectral imaging

the world's first UAV-based system to detect photosynthesis with true spatial resolution. Made for scalable field research in agriculture, ecology, and climate science.

Data

Tracking real-time photosynthesis to assess vegetation vitality. We reveal how plants respond to heat, drought, and stress – in real time and across landscapes.

Climate Research & Food Security

Our Data enables better crop forecasting, sustainable land management, and deeper understanding of the global carbon cycle.
